Professional Profile

6 years of relationship management experience in combination with computer programming education and love for software development writing beautiful code. Looking to bring my strong mathematical knowledge, user-focused technical understanding, and communication skills, while expanding my knowledge in Cloud web services (Google Cloud Platform, Microsoft Azure, AWS), Javascript Frameworks (vuejs, react native), other programming languages (R, Go, Golang, Ruby), big data, data science/visualization and machine learning.

Highlight of Skills

- 2 years of full-stack developer experience
- 1 year of exposure to software development concepts and product driven development
- Tech stack in production level includes Vue, Typescript, Google Cloud Platform, AWS, Azure.
- Experience working with a version control system (Git)
- Familiar coding with typescript/javascript Frameworks- Node JS, Vue JS, Webpack
- Familiar with RDBMs and NoSQL (Google Big Query, MySQL, Azure CosmosDB, Google Firestore)
